# MANAGED DETECTION AND RESPONSE (MDR) FOR ENTERPRISE

**Enterprise security leaders face a unique set of challenges: sprawling technology stacks, specialized tools, and mission-critical systems that demand bespoke protection.**

For organizations operating with highly complex environments spanning cloud, on-premises, legacy systems, and proprietary applications, rigid Managed Detection & Response (MDR) models don't work, and don't account for:

- Third-party and in-house log sources
- Unique detection logic and playbooks
- The need for aligned, continuous collaboration between the SOC and internal teams

Standard MDR solutions often fall short, leaving gaps in visibility, response, and alignment. 76% of organizations have suffered cyberattacks tied to unknown or unmanaged assets—a direct result of incomplete visibility and inflexible coverage.

Rapid7 MDR for the Extended Enterprise is built to bridge those gaps— delivering meaningful customization, collaborative alignment, and tailored detections across your environment, with full-service 24x7 protection from our global SOC. It's a powerful expansion of Rapid7's award-winning MDR, purpose-built for large enterprises that need flexible, expert-led cybersecurity coverage that meets them where they are.

## KEY OUTCOMES

**Customization & Flexibility**

Tailor MDR coverage to your unique environment, ensuring alignment with enterprise workflows, technologies, and priorities.

**Operational Collaboration & Alignment**

Establish an integrated working model between your team and Rapid7's SOC, enabling faster, more effective threat response.

**Maximise Existing Investments**

Extend the value of your current security stack through seamless integration, reducing tool redundancy and improving ROI.

**Specialized Expertise & Continuous Innovation**

Gain access to deep security expertise and constantly evolving detection capabilities built to match the complexity of your environment.

| CAPABILITY | OUTCOME |
|---|---|
| **Customized Detections**<br>Tailor MDR to your specific tools and detections | • Complete visibility across your unique environment<br>• Reduced risk from unmonitored tools and applications |
| **Custom Event Source Integration**<br>Ingest proprietary or vertical-specific data | • Full situational awareness<br>• Visibility and monitoring of critical business systems<br>• Reduced dwell time<br>• Better ROI on current security stack |
| **Engagement Model & Collaboration**<br>Establish shared workflows with Rapid7 SOC | • Faster response times<br>• Fewer handoffs and miscommunications<br>• Increased team efficiency |
| **Tailored Threat Monitoring**<br>Monitor what others can't - or wont | • 24/7 monitoring for in-house tools and applications<br>• Detect attacker behavior earlier across your extended ecosystem<br>• Correlate activity across endpoint, cloud, network, and user layers |

# TAKE COMMAND OF ENTERPRISE-SCALE RISK

Whether you're managing critical infrastructure, defending sensitive data, or overseeing a globally distributed environment, Rapid7 MDR for the Extended Enterprise gives you the confidence to move faster, respond smarter, and defend deeper—with a partner that's built to evolve with you.

**76% of organizations have suffered cyberattacks tied to unknown or unmanaged assets.”**

### About Rapid7

Rapid7 is creating a more secure digital future for all by helping organizations strengthen their security programs in the face of accelerating digital transformation. Our portfolio of best-in-class solutions empowers security professionals to manage risk and eliminate threats across the entire threat landscape from apps to the cloud to traditional infrastructure to the dark web. We foster open source communities and cutting-edge research–using these insights to optimize our products and arm the global security community with the latest in attacker methodology. Trusted by more than 11,000 customers worldwide, our industry-leading solutions and services help businesses stay ahead of attackers, ahead of the competition, and future-ready for what's next.
