

Ready for faster, easier, and more secure transactions?

It's done **via** AUTHVIA®

91% of consumers message with businesses.

Well, what if they paid that way?

AUTHVIA vastly improves the payment experience over outdated, inefficient, and unsecure payment methods (email, snail mail, or phone calls). Let's introduce your business operations to the modern age.

1. Meet Customers Where They Are.

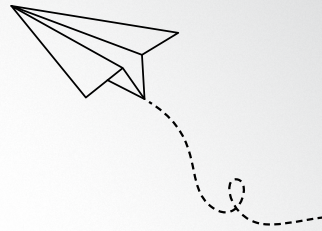

AUTHVIA works in your customer's text messages, app free. secure transactions like payments, approvals, signatures, and tips all in a simple message thread.

2. Protect Your Customer's Payment Data.

AUTHVIA offers the highest level of PCI compliance, PCI DSS Level 1. All PCI data is kept on AUTHVIA's servers and is AWS encrypted. So, only consumers can maintain and access their payment information.

3. Get Paid (much) Faster.

Our patented TXT2PAY® solution drives quicker time-to-cash by increasing consumer engagement—95% of texts are opened within three minutes. That's fast.

4. Enjoy a Quick, Contactless Option.

With AUTHVIA, consumers have the freedom to make transactions, via code, on the go. No more hours wasted waiting in line or on hold. (So long, elevator music.)

5. Offer Convenient Payment Solutions.

AUTHVIA has an industry-leading 71.6% NPS score across platforms and easily integrates with 200+ processors and supports credit, debit, AHC, and custom tenders.

6. Relieve Wasted Employee Hours.

AUTHVIA streamlines internal resources to save time, reduce paperwork, and create a better payment journey for your customers. With over 150 integration options, implementation is simple. So, your team can get back to their day jobs.
