8x8 Voice for Microsoft Teams

8x8 Voice for Microsoft Teams supercharges Teams with global PSTN calling and powers the 8x8 Contact Center for Microsoft Teams

8x8 Voice for Microsoft Teams is an Azure-based direct routing service that enables Teams users to make and receive calls over the public switched telephone network (PSTN) using the native Teams desktop, mobile, or web app.

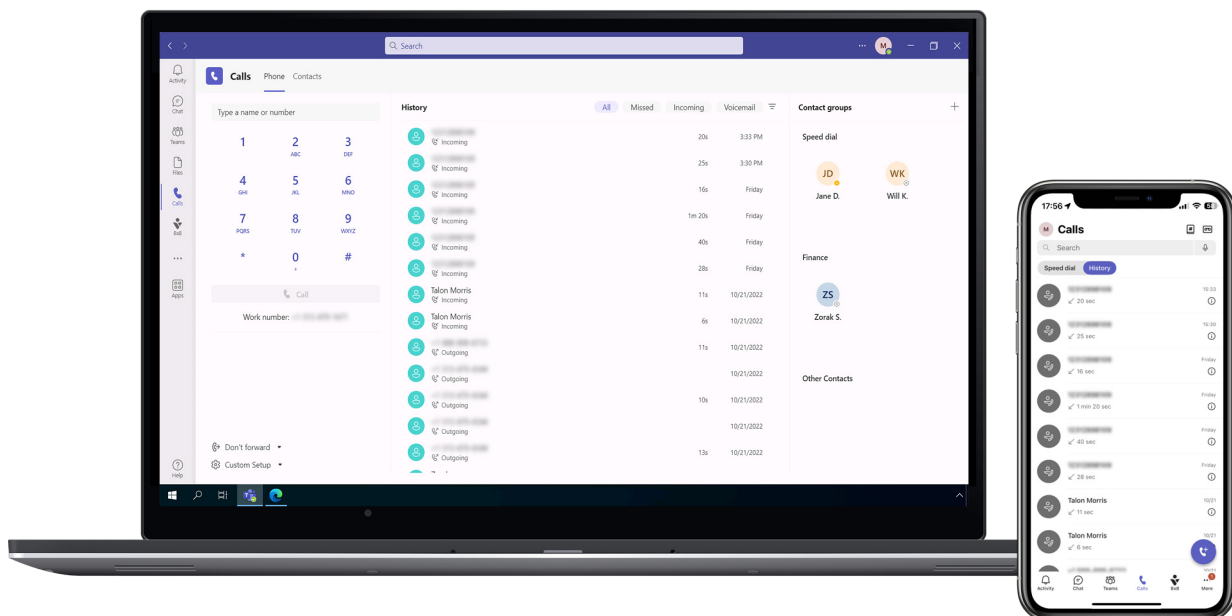

It removes administrative complexities of setting up on-premises equipment, SIP trunks or end-user software, and enhances the Teams user experience through the agility of 8x8 Experience Communications as a Service (XCaaS). 8x8 XCaaS offers global reach, cost-effective calling plans that feature unlimited options, and additional capabilities all supported by the reliability of an industry-leading SLA.

Organizations also benefit from rapid deployment and flexible calling plans, including unlimited local and international calls to 48 countries, full PSTN replacement in over 50 countries, and virtual number support for local DID or toll-free numbers in more than 100 countries.

8x8 Voice for Microsoft Teams enables contact center agents, using 8x8 Contact Center with Microsoft Teams, to simplify customer engagement workflows.

With the 8x8 Voice for Microsoft Teams app, users can conveniently send or receive business SMS¹ texts, MMS¹ messages, or faxes within Teams, without the need to switch between apps.

8x8 Voice for Microsoft Teams gives your organization all the benefits of a global enterprise communication solution, saving you time and money without the hassle of managing a communications and contact center infrastructure or complicating the Teams user experience.
