

Vote Jackson Huemer

For Vice-Chair of Domestic Assignments

Who I am:

National referee since 2016

International referee since 2018

FIE license holder for Foil and Epee

Coached 6+ years across local, regional, and national events

Former President of NJ High School Coaches Association (NJIFA)

Epee fencer with 17+ years of competitive experience

Why I am running: I believe that Vice-Chair for Domestic Assignments is an essential role, with the referee in that position being entrusted with the proper delegation and management of every event and referee for all national events. With this role being of such importance, it requires a hands-on approach of consistent and focused feedback and management, while also entailing a proper delegation of administrative workload. I believe I have the energy, ideas, and focus to not only help current and new assigners grow and succeed, but to encourage referee development and usage that allows for a stronger cadre in the years to come.

What I want to focus on: There are several areas of opportunity that I would like to address as Vice-Chair.

- First, help bridge the gap between committees, vice-chairs, and data within the referee commission to allow assigners to be empowered and informed as much as possible before an event.
- Second, be a tireless source of feedback and communication with assigners, referee coordinators, and the cadre at large, before, during, and after national events.
- Third, push for the study and implementation of pod captain operating procedures, usage reports, and qualifications to help create a more consistent and efficient tableau management.

Above all, I would continue to be an advocate for referees on the floor and at the bout committee table through consistent communication and coordination.

I know how central referees are in fencing, and am dedicated to serving our group going forward. I ask that you for me, Jackson Huemer, for Vice-Chair of Domestic Assignments!
