

### **2024-2025 Selection Policy Change Log:**

- **March 5, 2024:** Updated A and B Standards to correct rounding and calculation errors.
- **March 11, 2024:** Selection Procedure wording updated to reflect A/B Standard average based on 12<sup>th</sup> place (not 10<sup>th</sup> place).
- **April 15, 2024:** Word choice adjustment (changing “as” to “based on”) in “Establishing A and B Standard Qualification Totals” section.
- **April 15, 2024:** While reviewing feedback on our A and B standards, which are based on IWF-reported competition results, we discovered multiple errors in the IWF data. These errors include duplicate results, missing results, and incorrectly entered results. However, we have decided to keep the standards as currently published and will not be making any further adjustments until January 2025, when we are scheduled to review updated data and reset the standards. The currently published standards align with our stated selection procedure philosophy and set appropriate targets for our athletes. We will communicate with the IWF to ask for improvements in their data reporting in advance of our next round of standards setting in January 2025.
