1) The jump difficulty matrix is to be used as a tool and resource when scoring the difficulty category of a given jump act. The matrix is NOT intended to be used when scoring the categories of flow, execution, or spectator appeal.

2) A given jump act is to have a minimum number of three jumps. If a team chooses to utilize fewer than three jumps, they will be assessed a zero for each jump less than three they do not perform. The three jumps may be part of a continuous act.

3) For all jumps completed successfully, the given judge can use the attached difficulty matrix as a resource in formulating a score for the difficulty category based on an average of the jumps performed.

4) After figuring the average of the jumps completed, the judge will skew the score within a 1 to 3 point range toward the highest jump completed successfully.

5) If they call a named jump such as a Widow Maker, make sure they do what they are saying.

6) Jumps with extra splitters and/or cutters can be skewed to the right

7) KICKER JUMPS: When jumps occur on a kicker ramp 8' wide or less, 1-3 additional points may given for a jump with 3 or more jumpers.
