## 2024 ACR RISE Registry Recommended Quality Measures List

The ACR RISE registry has identified quality measures recommended for rheumatology practices in RISE. These suggested measures represent a variety of areas important to treating patients with rheumatic diseases while also optimizing the points available for 2024 Quality Payment Programs (QPP) including traditional Merit-based Incentive Payment System (MIPS) and the new MIPS Value Pathway (MVP) reporting. **This document serves solely as a resource for rheumatology practices having difficulty selecting quality measures; practices are not required to choose these as a part of their preferred measures.**

See the full list of [2024 RISE Quality Measures](#) as a reference. As a reminder, practices can only select 10 quality measures for their dashboard in RISE.

Measure Title	Measure ID#	Measure Type	Traditional MIPS and/or MVP Reporting
<i>*Based off the 2024 quality benchmarks, these measures below may yield the highest QPP points; these may be most optimal for practices intending to report for 2024 QPP through RISE.</i>			
*Hepatitis B Safety Screening	ACR10	QCDR Measure	Traditional MIPS
*Disease Activity Measurement for Patients with PsA	ACR12	QCDR Measure	BOTH
*Gout: Serum Urate Target	ACR14	QCDR Measure	BOTH
*Safe Hydroxychloroquine Dosing	ACR15	QCDR Measure	BOTH
*Rheumatoid Arthritis Patients with Low Disease Activity or Remission	ACR16	QCDR Measure	Traditional MIPS
*Documentation of Current Medications in the Medical Record	eCQM130	eCQM	BOTH
*Controlling High Blood Pressure	CQM236	CQM	Traditional MIPS
*Preventive Care and Screening: Screening for High Blood Pressure and Follow-Up Documented	eCQM317	eCQM	Traditional MIPS
<i>In addition, these measures below are valuable to the field of rheumatology and are recommended for consideration.</i>			
Tuberculosis Screening Prior to First Course of Biologic and/or Immune Response Modifier Therapy	CQM176	CQM	BOTH
Rheumatoid Arthritis (RA): Periodic Assessment of Disease Activity	CQM177	CQM	BOTH
Rheumatoid Arthritis (RA): Functional Status Assessment	CQM178	CQM	BOTH
Rheumatoid Arthritis (RA): Glucocorticoid Management	CQM180	CQM	BOTH
Gains in Patient Activation Measure (PAM) Scores at 12 Months	CQM503	CQM	BOTH
