555 Dirksen Senate Office Building Washington, D.C. 20510

The Honorable Chrissy Houlahan U.S. House of Representatives 1727 Longworth House Office Building Washington, D.C. 20515

Dear Senators Rosen and Boozman and Representatives Babin and Houlahan:

On behalf of our organizations, we thank you for reintroducing the "Resident Education Deferred Interest (REDI) Act" (S 942/HR 2028) that, if passed, will allow borrowers to qualify for interest-free deferment on their student loans while serving in a medical or dental internship or residency program.

The cost of graduate-level medical and dental education is substantial for the vast majority of students. Further, those who spend years in residency with very low pay often cannot begin to repay their student loans after graduation. While they may qualify to have their payments halted during residency through deferment or forbearance processes, interest continues to accrue on their loans and is added to their balance.

The REDI Act addresses this issue by ensuring physicians and dentists are not penalized during residency. The bill prevents the government from charging interest on their loans during a time when they often are unable to afford to make payments on the loan principal. The REDI Act does not provide any loan forgiveness or reduce a borrower's original loan balance.

Providing student loan relief also is a workforce issue. According to HRSA's latest report from 2024, nationally, across all physician specialties in the United States, there is a projected shortage of 187,130 full-time equivalent (FTE) physicians in 2037. In fact, 31 out of the 36 physician specialties reported in this brief are projected to have shortages in 2035. HRSA has also projected that the demand for general dentists as well as several dental specialists is predicted to exceed supply by 2037. The REDI Act allows medical and dental residents to save thousands of dollars in loan interest, making it more feasible for them to consider opening practices in underserved areas or pursuing careers in academia or research.

Passage of the "REDI Act" is an important part of student loan repayment reform. Thank you again for your support on this important issue.
