COLLECTION

In 1965, Amway created the GLISTER Multi-Action Fluoride Toothpaste, a toothpaste with special polishing and cleaning agents that clean and strengthen teeth so well that they “glisten”. This toothpaste went on to become our best-selling product around the globe*. That's not all.

We at Amway believe that optimal oral health starts with daily toothbrushing and goes further. For this very reason, we created a complete Oral Health Care System that comprises the GLISTER Multi-Action Fluoride Toothpaste, GLISTER Advanced Toothbrush, GLISTER Concentrated Anti-Plaque Mouthwash and GLISTER Mint Refresher Spray.

A very common oral health issue is cavities. It typically arises from the accumulation of plaque on teeth, producing acid that erodes the tooth enamel. However, incorporating the complete GLISTER collection into your daily oral hygiene routine will help keep your teeth healthy and safe from cavities, gingivitis, bad breath, teeth sensitivity and other oral diseases.

With GLISTER,
you and your family's
smiles will be bright,
fresh and healthy –
always.*

*Based on unit volume.

GLISTER MULTI-ACTION FLUORIDE TOOTHPASTE

683300 | 200 g

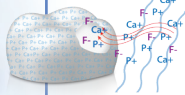

Made with polishing and cleaning agents which specialise in fighting plaques, the GLISTER Multi-Action Fluoride Toothpaste ensures teeth stay strong and brilliantly white.

Fluoride content

Formulated with the REMINACT™ formula, which helps redeposit minerals back onto the enamel, making teeth stronger and more resistant to cavities.

How does REMINACT work?

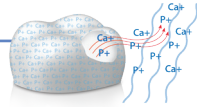

Step 1

Acids in the tooth plaque reduce the mineral content in teeth thus making them more vulnerable to decay.

Step 2

REMINACT fluoride formula replenishes teeth's essential natural minerals such as calcium and phosphorus.

Step 3

This results in stronger, healthier teeth.

Fresh mint scent

Gives your mouth a fresh, reinvigorating sensation after brushing.

GLISTER ADVANCED TOOTHBRUSH

100957 | 4 pcs per pack

With its uniquely-designed handle and head, the GLISTER Advanced Toothbrush massages the gums while providing comfort, control and reach to effectively clean between teeth and the gum line.

Exclusive bristle pattern

- Combines soft and medium bristles
- Interdental bristles clean between teeth and the gum line

Ergonomically-designed handle

- Flexible neck reduces excessive pressure on teeth and gums
- Gently cleans without damaging gums
- Comfortable, non-slip grip for easy-to-control brushing

Patented head design

- Thinner tip provides effective cleaning of hard-to-reach places
- Slim head contains over 2,600 bristles
- More bristles provide better cleaning

In-mould technology

- In-mould technology provides 75% more bristles on a thinner head, allowing for more effective cleaning of hard-to-reach places
- More tufts per head combined with more bristles per tuft provide more effective cleaning

GLISTER CONCENTRATED ANTI-PLAQUE MOUTHWASH

994900 | 50 ml

Supplementing the plaque-fighting benefits of the GLISTER Multi-Action Toothpaste, the rinse helps kill bacteria that cause bad breath and helps remove more plaque than brushing alone can.

Fights plaque, gingivitis and bad breath

- Helps kill over 99% of the plaque bacteria that causes bad breath
- Helps prevent over 99% of plaque/biofilm formation
- Helps prevent over 99% of gingivitis-causing bacteria

Fast-acting formula

- Helps kill oral bacteria in only 30 seconds
- Helps keep teeth free from gingivitis-causing bacteria
- Has a lasting effect for at least 10 minutes after use

Concentrated formula in a space-saving container

- 50 ml bottle provides over 100 uses

GLISTER MINT REFRESHER SPRAY

120351 | 14 ml

With the GLISTER Mint Refresher Spray, enjoy a cool and clean feeling with one quick spray. This convenient non-aerosol spray provides long-lasting fresh breath on the go – anytime, anywhere.

Cool, minty taste

- Provides long-lasting fresh breath instantly

Non-aerosol formula

- Propellant-free formula discreetly freshens breath

Sugar-free

- Sugar-free alternative to gum and mints

Increased volume and new pump head

- Each spray contains a higher concentration of the product
- Long lasting, portable and convenient
